

WANT CLEAN WATER FOR YOUR FAMILY?

Do you clean your septic tank every 2 to 5 years?

100% of Pound Ridge homeowners use septic systems. Failing septic systems allow pathogens and contaminants to enter our shared water supply.

Do you use organic products on your lawn and to clean your house?

Find environmentally friendly cleaning solutions and priceless lawn maintenance tips at the link below.

Have you replaced your underground oil tank before it leaks?

The average lifespan of an underground oil tank is 18 years. How old is yours? Check with your supplier if you're not sure.

Do you throw unused prescriptions in the trash and not down the drain?

Pharmaceuticals and personal care products can enter our water supply. You can dispose of expired prescriptions in the receptacle at the Pound Ridge police headquarters.

WORKING TOGETHER, WE CAN PROTECT OUR DRINKING WATER

For more information about keeping harmful bacteria, chemicals, fuel oil and medicines out of our water, go to our town's website: www.townofpoundridge.com/boardsandcommissions/conservation-board and follow us on Twitter [@PoundridgeCB](https://twitter.com/PoundridgeCB)
